Customer Journey Map

Mapping out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities.

Phase of Journey	Stage 1: Submission	Stage 2: Evaluation	Stage 3: Decision Display
Actions <i>What does the customer do?</i>	Fills out the online credit card application form with personal, income, and employment details.	System encodes the input and scores it using the trained XGBoost risk model.	Applicant receives an instant Approved / Needs Review result with a risk probability.
Touchpoint <i>What part of the service do they interact with?</i>	Web application form ("Check Eligibility" page).	Backend prediction engine (Flask app + trained model).	Result web page.
Customer Thought <i>What is the customer thinking?</i>	"I hope I entered all my financial details correctly."	"I wonder how the system decides who's risky."	"I'm relieved if approved - or I want to know why if flagged."
Customer Feeling <i>What is the customer feeling?</i>	Nervous, hopeful	Curious, anxious	Relieved OR frustrated

Process Ownership <i>Who is in the lead on this?</i>	Frontend / Product team	Backend & ML team	Operations & Customer Success
Opportunities <i>How can we improve this stage?</i>	Add input validation and helper tooltips for form fields.	Show a brief "analyzing" animation and expose the confidence/probability score.	Provide clear next-step guidance for flagged applications instead of a bare label.
