

Communication

Date	15/07/2026
Team ID	SWTID-2026-3095
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Communication Plan:

S.No	Communication	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	WhatsApp group	All 4 members	Quick sync on blockers and daily progress
2	Progress Update	Weekly	Google Meet	All 4 members	Review sprint progress against the plan (Folder 4)
3	Issue / Bug Discussion	As Needed	GitHub Issues + WhatsApp	Relevant members	Track and resolve bugs (e.g. the zero-income approval issue)
4	Stakeholder Review	Bi-Weekly	Google Meet	All 4 members + mentor	Get feedback on model quality and UI direction
5	Final Demo Rehearsal	Once	In-person / Google Meet	All 4 members	Rehearse the demo flow and timing before submission

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Original model approved applicants with zero/implausible income	Diagnosed as a survivorship-bias gap in the training data (no such examples exist); added a deterministic rule gate ahead of the ML model rather than patching the symptom.
2	Inconsistent local dev environments (one member on Windows ARM64 hit pip/package incompatibilities)	Standardized on a pinned requirements.txt; the affected member used Kaggle Notebook as a fallback environment for model training.
3	Disagreement on how aggressively to flag applicants for review (recall vs. reviewer workload)	Settled via a data-driven comparison: a recall-floor policy flagged over 50% of applicants, so the team adopted the F2-optimal threshold instead (~3% flagged, ~42% of true risk caught).
