

Project Demo Planning

Date	15/07/2026
Team ID	SWTID-2026-3095
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Project Demo Planning:

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Why a single ML model approving zero-income applicants is a real failure, not a tuning issue	3	Ragi Prakash
2	Solution Overview	Rule gate → ML scoring → SHAP explanation architecture walkthrough	4	VAKA VENKATESH
3	Live Demo: Rule-Gate Decline	Submit an application with Rs. 0 income → instant deterministic decline	3	Sontineni Sai Krishna Chowdari
4	Live Demo: ML Scoring + Reason Codes	Submit a borderline applicant → show the risk gauge and SHAP reasons	4	Yarra Vivek
5	Metrics & Honest Limitations	Walk through ROC-AUC, the F2 threshold trade-off, and the 1.69% positive-rate ceiling	3	VAKA VENKATESH
6	Q&A; Session	Open floor for questions from evaluators	5	All members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Set up the zero-income failure mode as the motivating example
2	Solution Overview	Show the architecture diagram (Folder 3) before the live demo
3	Live Feature Demonstration	Two scenarios: rule-gate decline, then ML scoring with reason codes
4	Q&A Session	Anticipate questions on the 1.69% positive rate and threshold choice
